NRGSTREAM TRADER X Release Notes

Acquiring and managing ISO data can be one of the most grueling tasks of the modern world. Power markets are constantly changing, as are your unique data needs. Luckily, with the release of NRGSTREAM's TRADER version X, data automation and integration has never been easier.

We are pleased to announce the release of NRGSTREAM TRADER version X. TRADER X raises the bar, a modern fully browser-based UI that builds on previous releases of TRADER and XTRACTOR. TRADER X is faster, smarter and more scalable. Our best version yet.

Featuring:

- **New, dark display mode** on charts, panels, dashboards, and maps Toggle between light and dark display mode with the flip of a switch.

Dashboards:

- **New, add charts and panels to dashboards** without leaving your dashboard. A more intuitive approach to building dashboards

Extracts:

- **New Windows Tray application provides legacy extract, Excel Add-in and macro** support.

General:

- We used the latest technologies and best practices to design and implement **TRADER X'** browser-based UI. As a result, TRADER X provides a better overall user experience added capabilities, performance, and the reliability and accuracy you trust.

We hope you enjoy!

The NRGSTREAM Team
