

NRGSTREAM Trader 8.1 Release Notes

Acquiring and managing ISO data can be one of the most grueling tasks of the modern world. Power markets are constantly changing, as are your unique data needs. Luckily, with the release of NRGSTREAM's TRADER version 8.1, data automation and integration has never been easier.

We are pleased to announce the release of NRGSTREAM TRADER version 8.1. Building on the release of XTRACTOR V.3 in the spring of 2020. TRADER 8.1 integrates the completely re-designed **Extracts** feature. Faster, smarter and more intuitive. Our best version to date.

Extracts:

- **Sub-hourly extracts.** You can schedule sub hourly extracts now (4 days max).
- Runs up to **10 simultaneously scheduled extracts concurrently.**
- The latest technologies and best practices.
- User friendly, legible and easy to navigate.
- New action icons are embedded for quick convenient access to features and overall ease of use.

Charts and Panels:

- New **Add to Dashboard** capability makes it easy to imbed your custom charts and panels in your dashboards. From the chart or panel right-click menu select the Add to dashboard option and choose your dashboard.

General:

- We have used the latest and greatest technologies and best practices to design our new interface. Providing you improved functionality, performance and reliability.

We hope you enjoy!

The NRGSTREAM Team
